

KLIPPEL R&D SYSTEM COMPUTER REQUIREMENTS

WHAT KIND OF PC IS REQUIRED?

The PC should meet the following requirements:

- PC Operating System¹⁾ Windows 7, 8 or 10
- Min. CPU requirements: Core 2 Duo 2.5GHz or equivalent
recommended: Core i5 3.0GHz or equivalent
- Min. RAM requirements: 4GB
 - *These specifications are sufficient for most applications running in dB-Lab. For applications that create or process significant amount of data, a high end system (i7 or equivalent, 64 bit Windows, 8GB RAM, SSD) ensures smooth, efficient and uninterrupted operation.*
- Min. 1 GB free disk space, plus disk space for measurement results²⁾
- Internet connection strongly recommended for online-support
- PC monitor with minimum 1280x800 pixel screen resolution
recommended: 1920 x 1080 pixel
- 2 USB (2.0 or higher) interfaces

1) While there are no known significant problems with the respective server systems (e.g. Windows Server 2011), they are not regularly tested and we can provide only limited support.

2) When planning a new PC, also consider the necessity of an automated regular backup to external storage
